

# LED High Bay Fixtures

Products supplied  
are approved for  
Ontario Energy  
Incentive Program

LED products are great for new or replacing existing fixtures: up to 1000w metal halide, high pressure sodium (HPS), or T8/T12 fluorescent

## Applications:

Ideal for retail stores, warehouses and industrial plant applications where energy efficiency is required. There are many styles available: round, linear, square, with/without lens and reflectors. Fixtures cost varies with efficiency (up to 135L/W). Explosion proof options also available, service life (up to 200,000 hours) & lumen maintenance (up to 80% service life with only 5% loss). Vapour seal options are ideal for indoor or outdoor use where exposure to dust, water or vapour is common. IP65 or greater are available. There are many options and we recommend asking our engineering team for a recommendation.

## Features:

### Strip-Style Led High Bay

- Utilizes LED SMD strips to ensure ease of replacement or retrofit of fixtures
- Cut energy costs over 70% - replaces up to 1000W metal halide and ballast
- Dimming and control options available
- 75W – 450W output
- Various LED power level and light outputs available
- Input voltage of 120-277V, 347V
- up to 200,000 hours rated life

### Circle-Style High Bay Design

- Available voltages: 120-277V/347v  
Wattage: 125W – 440W
- Cut energy costs over 70% - replaces traditional HID high bay fixtures
- Instant on - no warm up time needed
- Low glare
