

# Recessed Fixtures

Products supplied  
are approved for  
Ontario Energy  
Incentive Program

LED products are great for  
new or replacing existing fixtures

## Applications:

Recessed LED fixtures are becoming the standard lighting fixtures in the majority of offices, hospitals and retail installations with T-bar ceiling. The fixtures are available in many configurations allowing the light level to be closely matched to requirements.

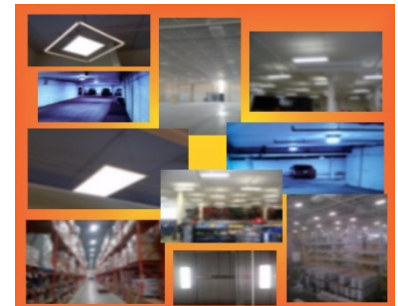

The list of models, types and sizes is extensive. Please consult our expert engineering team for a recommended solution that meets your specific needs.

Retrofit of existing T12/T8 or T5 recessed fixtures to new technology or styling is also available for virtually all fixtures to achieve energy savings or to upgrade to a new style. Styles available using LED tubes or modules are available.

Retrofit options require a custom made kit to facilitate the required changes and a variety are available.

## Features:

- 2x4, 1x4 and 2x2 options available
- LED with 1, 2, 3, 4 lamps or LED modules are available
- Input voltage of 120-277V, or 347V
- Full range of T5/T8 replacement options available
- Dimmable
- Lenses come in basic acrylic, or several decorative styles
- Fixture styles include standard flat panel, centre lens and centre perforated basket options
- Various colour options available
- To qualify for utility incentives products are CSA and DLC listed
